PROFESSIONAL SUMMARY

B.Tech Final year Computer Science student with hands-on internship experience building full-stack MERN applications. Proficient in JavaScript, React, Node.js, Express, and MongoDB with a track record of independently delivering production-ready features, writing clean RESTful APIs, and thriving in Agile environments. Seeking opportunities to contribute to impactful, collaborative engineering teams.

EXPERIENCE

MERN Stack Developer Intern | Remote

LOC | LOR

The Entrepreneurship Network

Dec 2025 – Mar 2026

- Worked in an **Agile environment** with twice-daily scrum stand-ups, consistently reporting progress, blockers, and deliverables to team leads
- Built a **full-stack Habit Tracker** using MERN — designed RESTful APIs for task management, implemented user authentication with bcrypt & JWT, and integrated frontend with backend APIs
- Performed **CRUD operations** with MongoDB and developed a responsive, component-based UI with React.js; independently debugged real-world issues and delivered features end-to-end

PROJECTS

Placement Management System | React, Tailwind CSS, Node.js, Express, MongoDB, Cloudinary

Live Demo | GitHub

- Built a full-stack PMS for college TPO — student portal for job browsing, applications, interview scheduling & resume uploads, admin dashboard for company management, job postings & applicant review
- Implemented **Role-Based Access Control** (JWT + bcrypt), **Cloudinary** file storage, **Joi** validation, **ExcelJS** export, real-time notifications, dark mode, and fully responsive design

Smart Habit Tracker | React.js, Node.js, Express.js, MongoDB, JWT, bcrypt

Live Demo | GitHub

- Developed secure authentication (bcrypt + JWT in HTTP-only cookies) and complete habit management with daily/weekly frequency support and one-click completion toggling
- Engineered a streak calculation engine with automatic recalculation on every toggle; designed an analytics dashboard with weekly rates, monthly trends, and a leaderboard

Real-Time Restaurant Ordering System | React.js, Firebase, Firestore, Tailwind CSS

Live Demo | Dashboard

- Built a full-stack restaurant management system with a customer menu app and kitchen dashboard; implemented real-time order sync via Firestore with instant notifications and audio alerts
- Designed a responsive mobile-first UI with glassmorphism styling, featuring cart management, order tracking, and an inventory system

EDUCATION

Jaipur Engineering College, RTU

Kota, India

Bachelor of Technology in Computer Science Engineering

Sep 2023 – Present

- CGPA: 8/10 (through 5th semester)

SVM Senior Secondary School, RBSE

Rajasthan

Senior Secondary (Class XII)

2023

- Percentage: 78.20%

TECHNICAL SKILLS

Languages: JavaScript, Python, C/C++

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap CSS, HTML, CSS

Backend: Node.js, Express.js, Firebase, REST APIs, MVC Architecture

Databases: MongoDB, MySQL, Firestore

Tools & Technologies: Git/GitHub, VS Code, Chrome DevTools, Figma, npm, Linux, Windows

Concepts: Data Structures, Algorithms, OOP, Agile/Scrum, Problem-Solving

CERTIFICATIONS

TCS iON Career Edge: Soft Skills

2023

NIIT Foundation: Digital Productivity

2024

AREAS OF INTEREST

- Building scalable, API-driven applications with modern backend architectures
- 3D web animations and immersive UI experiences using Three.js
- Mobile application development and progressive web apps (PWAs)
- Web3 technologies and decentralized application development
